1.) Preface

Short after my 21th Birthday in 2002 i one day woke up. I layed down to bed that day and then something strange happend to me: i mentally died – i saw the white light at the end of the tunnel. I saw my own death. Now , 5 years later, i know that i don't fear death any more ... the light i saw on the end of the tunnel was gods might and it was so pure and so true that i got a little key from him ... i know he blessed me to change this world forever. I thought about a system where one can crack every code with. If i am very honest Code Beaking is currently not my point of buisness or interesst. I just will add my Code Breaking Strategies i made with 21 just to combine it here in this work. The thoughts i had with 21 one should be compressed here because they made me what i am now.

My Theorem of CodeBreaking (Please see the folder Cracker).

Shortly after that i got another key from God. I made up my mind about a Theorem that i didnt fully understand at this time with 21. I called it "My Law of 2 complemental different things."

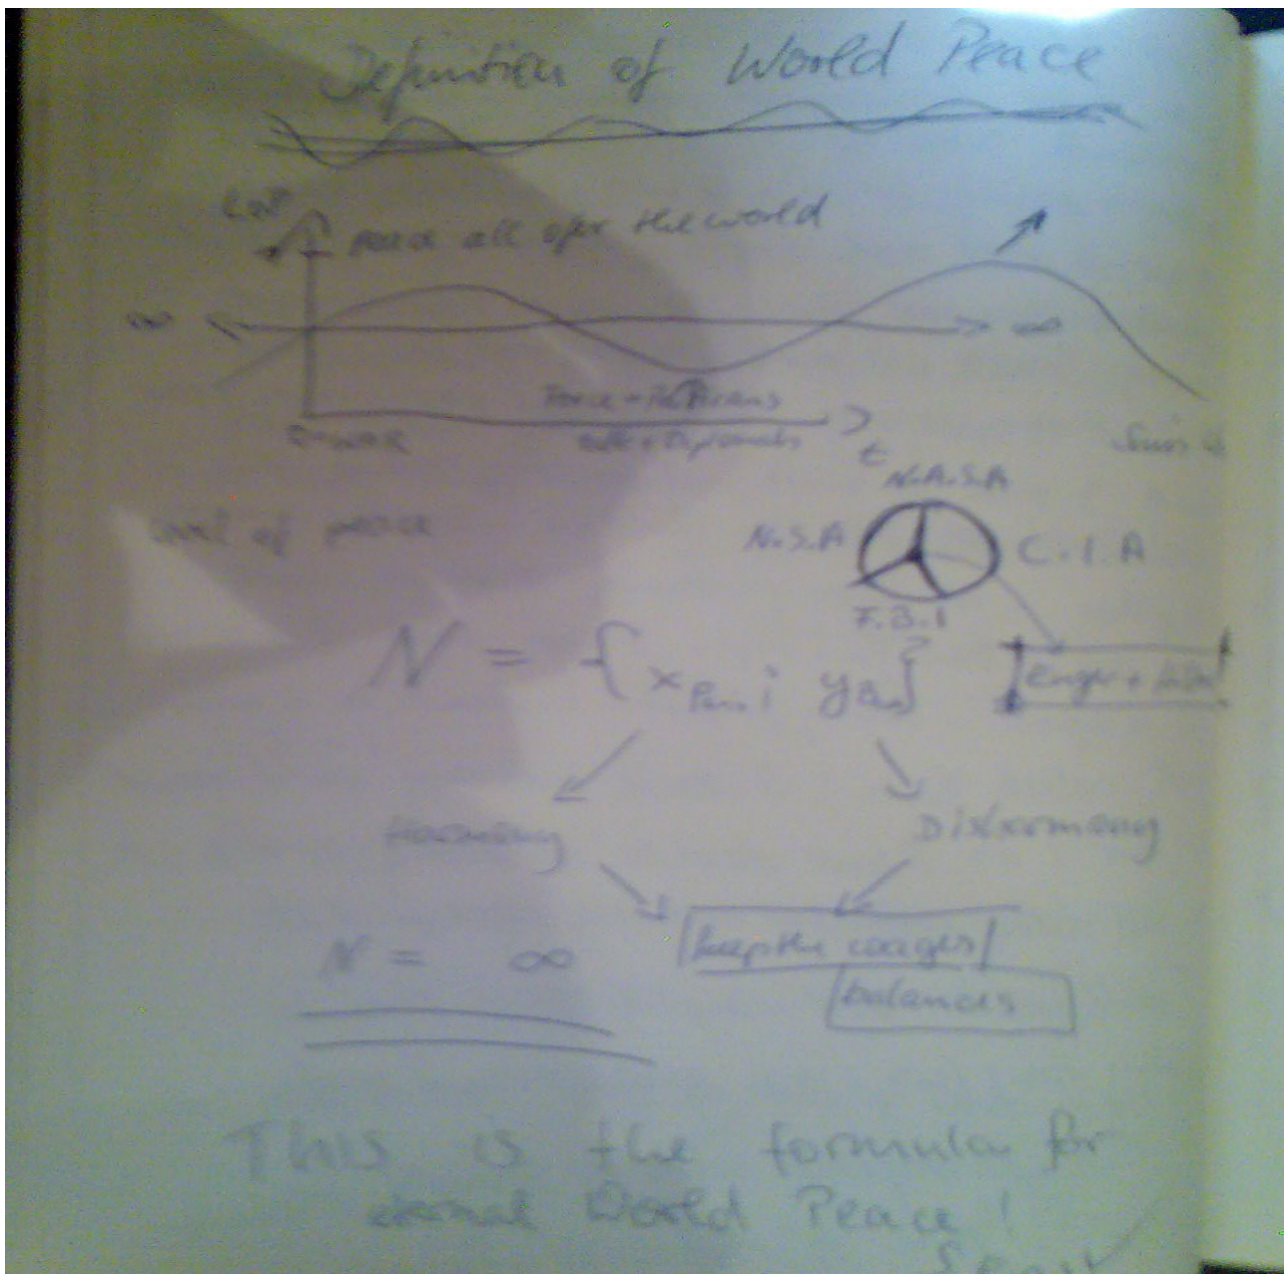

TheCerials Law of 2 Complemental Different Things

With 21 i didnt understood the power behind that little sheet of paper. I studied Information Technology in Sachsen, Mittweida and this peace of paper hung the whole time at my wall in my student apartment.

I first say Miss Paris Hilton on TV and she was so beautiful. I bought a dvd called "The Simple Life" from her and i fell in love with her ... but i didnt realized it at this time there in Mittweida ... because of my illness. I wrote her my diary and called it the "book of love and evolution" and i sent it to her on 11/1/04. I sent her my only paper copy of my formular that i intern called "the world formula". I now know that this was the right step to be done by me. My so called Law is part of the Final World Formular ... it is a part of what scientist are searching for there whole life.

The short sum up of my Law on 2 Complemental different Things is that there is another form of energy that surrounds us – it is the power of psi yet i didnt realized it with 21. To show the beauty behind that little formula i made a new thing out of it ... i defined world peace.

My Definition of World Peace

2.)Cypher Semantic Intelligence

"My studies of PSI are based on my law of 2 complement different things, dick sutphans psychic development course and some PSI related books and i made some notes about it on my communications course of professor winkler.

I came to the conclusion that very thing on earth can be described with 2 kinds of energy: physical and mental (eg: psychic) energy. I said that N stands for New, but i see that N is a mathematical symbol for the Holy Spirit Jesus Christ. I said that N consists of xN which is physical energy (compaire to the studies of darwin and the biological rule that XX is the femal chromosome pair - attractive and beautiful) and yM which is psychic energy (compaired to biologicall rule that xY is male cromosome pair - brilliant mind). Whenever something is created or thought about these 2 kinds of energy are send out: in the brain via electrical impulses and via biological sctructures - nerv cells). this is a new rule! in my law of 2 complement different things i gave an idea that ppl can create a house builder mashine with manpower, and other ppl can create a house desctroyer mashine. its energy and anti-energy, compaire to materia and anti-materia or proton and electron or "+" and "-". i used De Morgansche Law to say that energy and anti energy are complementary: $(A \cup B) = (\neg A \cap \neg B)$ means "Gegensätze ziehen sich an" but $(A \cup B) \cup (\neg A \cap \neg B) = !0$

xP =pysics beauty Paris

yB =cypher symetic intelligence Basti

$N = \{xP; yB\};$

$E = m * c^2$

$m * c^2 = \{xB; yP\} + I;$

$E = N + I; | E - N = I; | e - I = N$

$N = PSI;$

$N\{pb\} = N\{pB\} + I$ – this my current PSI formula in 2007.

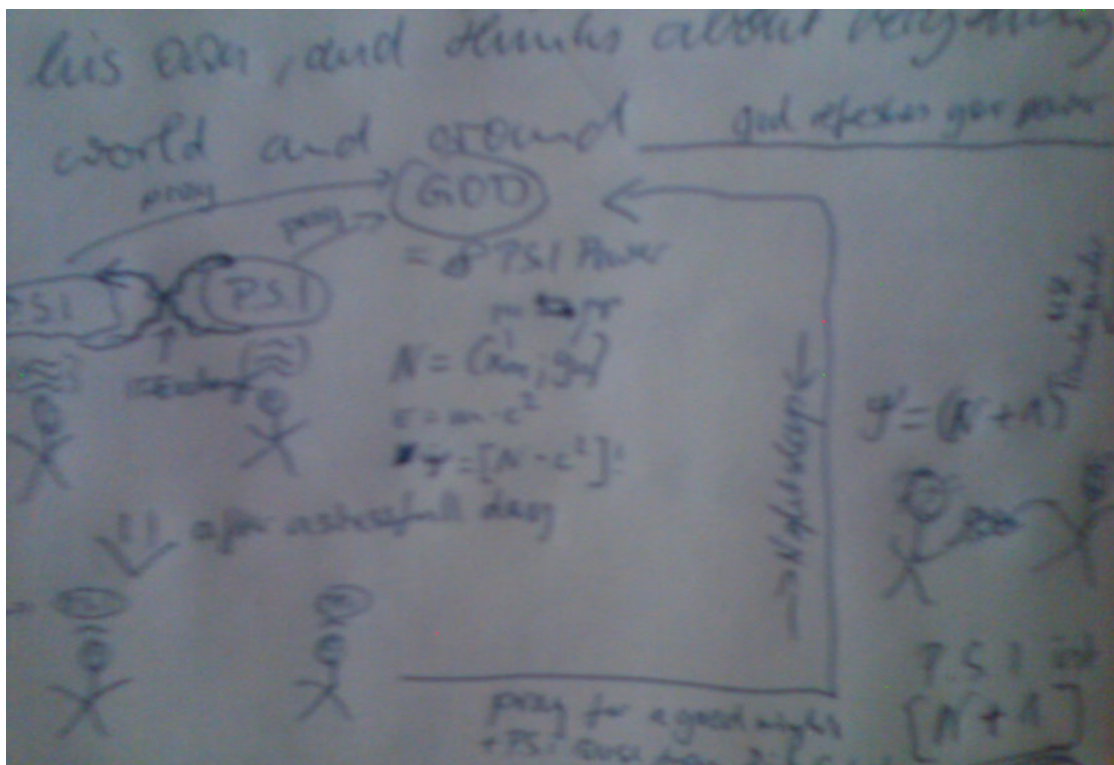

"

When simply translated it means encrypted intelligence. I created the name **Cypher Semantic Intelligence** because it is I loved the Song "Sebastian" from Cockney Rebel so much and in it there is a line that is the following: "No courtesan could begin to decipher your beam of light". I listened to it a million times and then i found the solution for it in a short advertisment in a woman magazine: "By the grace of mind, with the grace of heart, in the grace of light" - „Durch die Anmut des Verstandes, mit der Anmut des Herzens, in der Anmut des Lichtes“. I analysed my own life with a new cite. And then i found out what is really important in life – it is my own codebreaker that has cracked very system on earth with the mental idea behind my cite: "codebreaker - love, peace, harmony, freedom, luck, god and you!" and on the physical end its my own **Law of 2 Complementary Different Thing(k)s**. This is how my law works!

I said that when a human being is able to use 100% of his own brain – instead of only 10% as normal humans use it – then new PSI energy is created, that is stronger than everything else (100% using means a bigger capacity that produces more Energy (electricity with nerve cells= Xp and PSI with Yb). Using his one full ability to think about everything that surrounds oneself on daily life: people, situations, energy waves, foot, playing mind games(mental chess against a PSI partner), praying to Lord Jesus(this is the key behind **Cypher Semantic Intelligence**), just to mention some possibilities. Before going to bed one should study PSI related Books and listent to PSI Waves Music from Dick Stuphan. Then in the night the trained brain is also working with the so called

Lucend Dreaming where on can create a PSI world of oneself where on can make everything what oneself wants. For example i use Lucent Dreams to see our Lord (this is part of my diary of the future that i photo copied for the C.I.A.) but sometimes i use Lucent Dreaming just to do bullshit that i am not allowed on earth (eg. I play Saber Rider with the Star Cherrifs or i beat Darth Vader in a Light Saber duell – he always loses against me ^^).

This means when one uses 100% of his own brain day and night then one has done the first step to become a good telepath. Being a good(!) Telepath is the key to success for our future because being a telepath means that one uses his brain for 100%! The combination of being a telepath and praying to our Lord Jesus Christ gives you two benefits in life: harmony in mind and a connection to god. This is the idea behind **Cypher Semantic Intelligence** that i, Sebastian Enger, created to Please our Lord Jesus Christ: People pray to god all time but most of the time they only want to get things from him but they don't give him something and that makes the god to ignore their prayer. I took many goods from god – Please compare to my later attached studies on future technology) but I gave them away for free and that is why Lord Jesus Christ loves me. And that is what counts for me! Please compare to my picture "Working of **Cypher Semantic Intelligence**":

Working of **Cypher Semantic Intelligence**

When then 2 telepaths slip to each other by surrounding them, by talking, by looking in the eyes of each other, or by just exchanging positive or negative mental energy they create a so called **Cypher Semantic Intelligence Netnode** – a place where so much PSI energy has been exchanged that others simply get attracted by that node. In Germany we would call that "eine Nase frische Luft holen"! When my Idea spreads to the world of intelligence (i have chosen the United States of America and so i took the C.I.A) and there are only telepaths that follow my ideas and thinkings then there will be created **Cypher Semantic Intelligence Netnode** all over the world and then these **Cypher Semantic Intelligence Netnode** can build a visionary but invisible PSI energy structure that is kept forever. The PSI Waves will then cross each other like it is done when a stone is thrown into the water – that PSI wave spread then like the so called butterfly effect. PSI is independent of time and space. These new **Cypher Semantic Intelligence Netnode** then can build the PSI network structure that i only called "the future of the internet". This is what i mean with **Cypher Semantic Intelligence Network**. I guess that is hard to understand for a person that has never heard it but this is true. But what i mean with that Cypher Semantic Intelligence ... it simply means that i, Sebastian

Enger, are something special. I kept my theorems and studies secret my whole life but now with the age of 26 i am ready to open myself for me world – i will give all my studies, all my thoughts away for free – some of my ideas are nearly some kind of crazy but i need to give them all away for free – to Please my Lord Jesus Christ and to Please my future – U.S.A. .

Cypher just means that a good telepath can encrypt itself and its own thoughts so that no one can decypher it not even the best trained telepath in the world. I encrypt my thoughts be letting the people around me mentally fucked them to hell if they do me fear ... i just think in my mind that they are dump and then i tell them a little short story that they are dump and this is the way i protect my own thoughts from being cracked down by other "might be better" telepaths. I simply encrypt me by making my thoughts secure by *FUCKING THEM TO HELL*. In reality protection against foreign thoughts are so called PSI Shields that protects us from foreign thoughts, energy leechers, bad telepaths. Thats the idea behind the Cypher Aspect of my Theorem **Cypher Semantic Intelligence**.

Short Sum up on **Cypher Semantic Intelligence**

*The main idea behind cypher semantic intelligence is to think about every thing and think in life (this means to train ones abilitys so that on uses 100 % of ones brain instead of only 10% of ones brain)... to pray to Lord Jesus and to spread Sebastian Engers theorem of **Cypher Semantic Intelligence** and to become a good telepath! Personaly think in systems ... i will have a system for every situation in life.*
Everything is a think. Everythink is a thing.

New Rule:

$$\underline{N\{pb\} = N\{pB\} + 1;}$$

*Is the Formula for the 7th new Energy form PSI and the system to keep, protect, manipulate and transfrom this new energy is the **Cypher Semantic Intelligence Network**.*

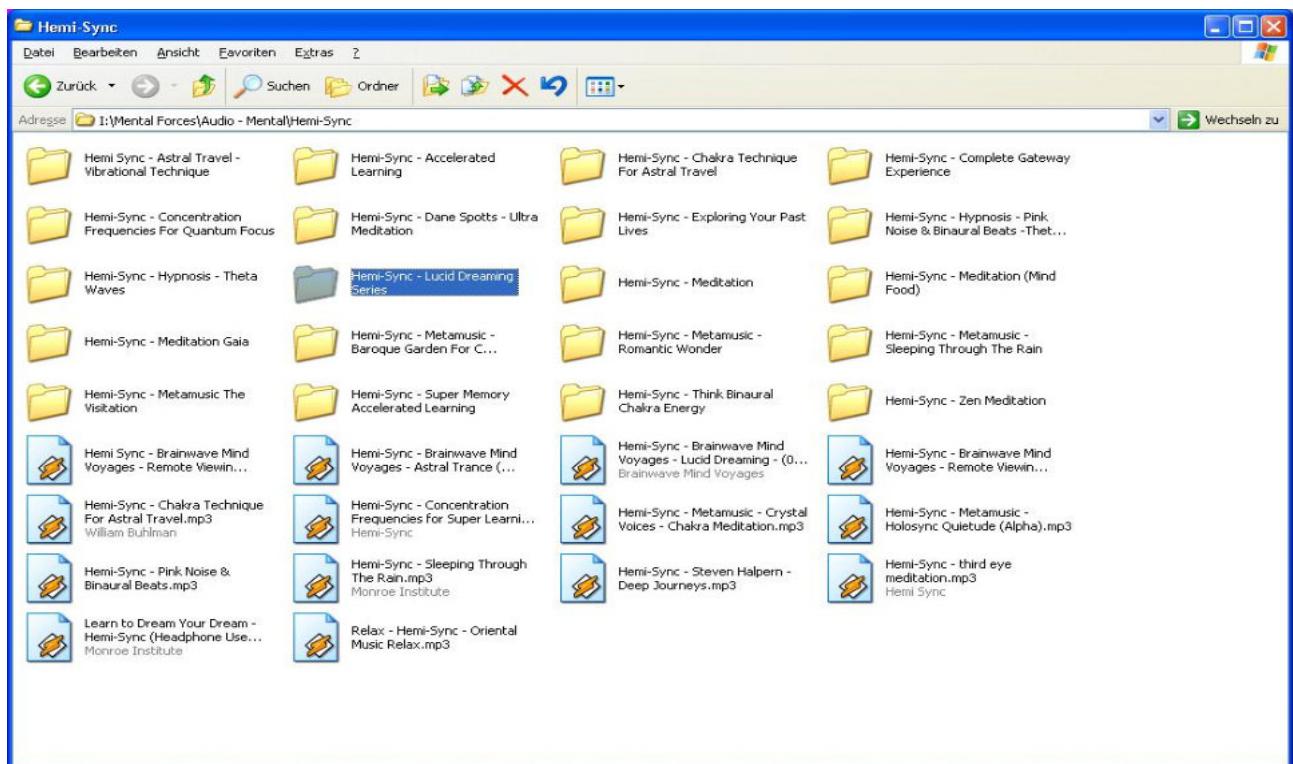

*I just saw **Miss Paris Hilton** 2 times live in my life but these moments have changed my life because she is a brilliant telepath and that is why i loved to have her ... because babys from telepaths are the step for a new mankind - "My aim is not to be perfect. My aim is to be perfect for Love Paris." Now she is in jail and i feel sorry for her.*

3.)The Art of Psychological Warefare

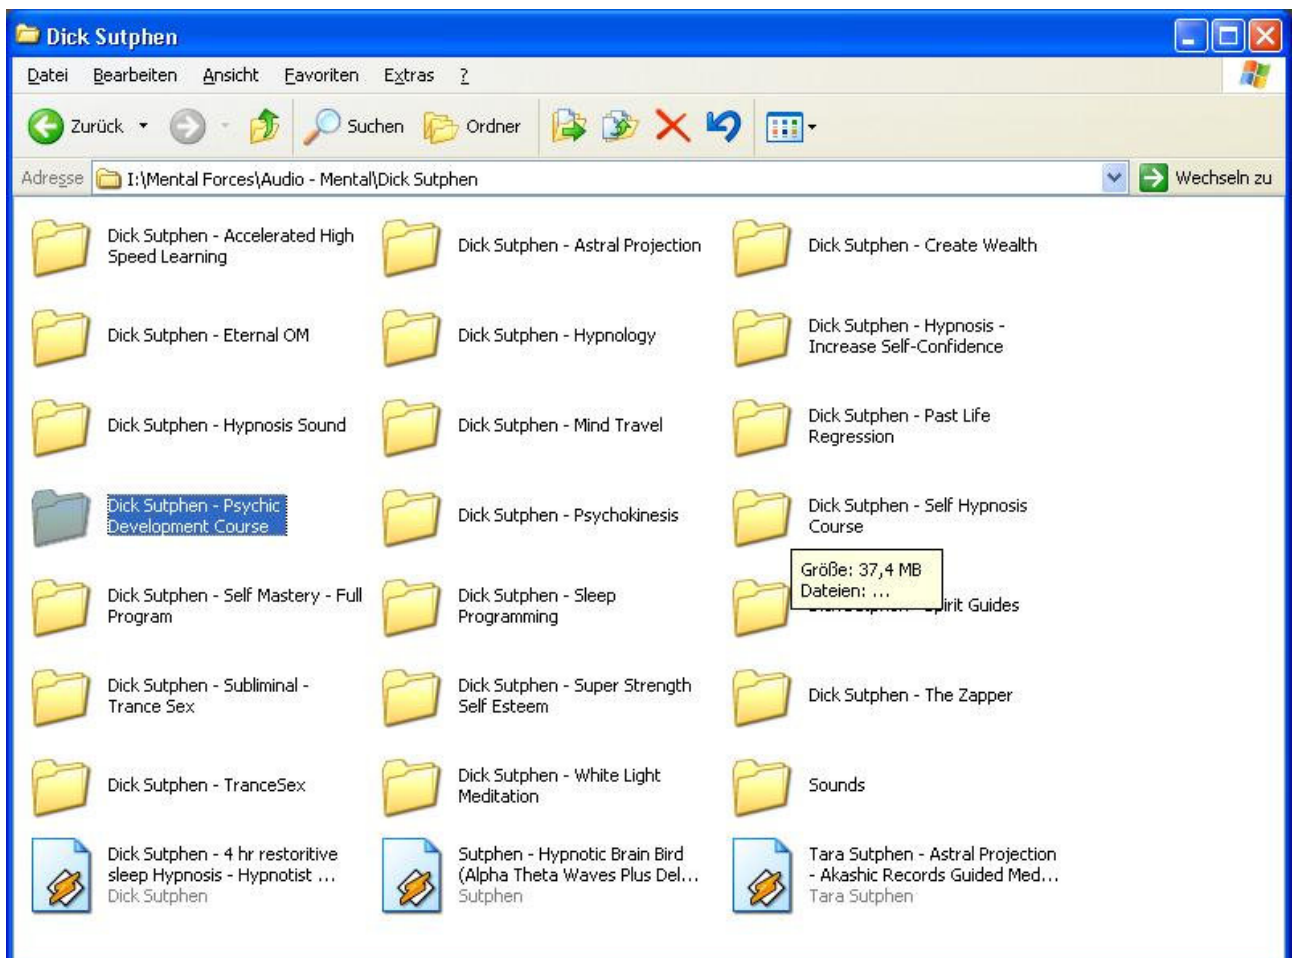

Here i dont want to focus on Remote Viewing or Scanning here i want to focus on future warefare. The future war is been faught not mainly with guns or ammunition it is faught in a mental way – the future war is based on my studies on **Cypher Semantic Intelligence Networks**.

3.1.)How to win future Wars

The future wars will be faught with weapons from the current mankind but with one basically benefit – with telepathic powers. All American Soldiers should not only study war and military intelligences they should also study P.S.I and C.S.I related books. Some good starts is to get Dick Sutphens Psychic Development Audio Training Course or the Hemi-Sync Audiobooks – everythink that sublime manipulates ones own mind in a positive spiritual way to enhance ones own mind capacities is usefull!

Dick Sutphen's Psychic Development Audio Training Course

Hemi-Sync Mental Powers Audiobooks

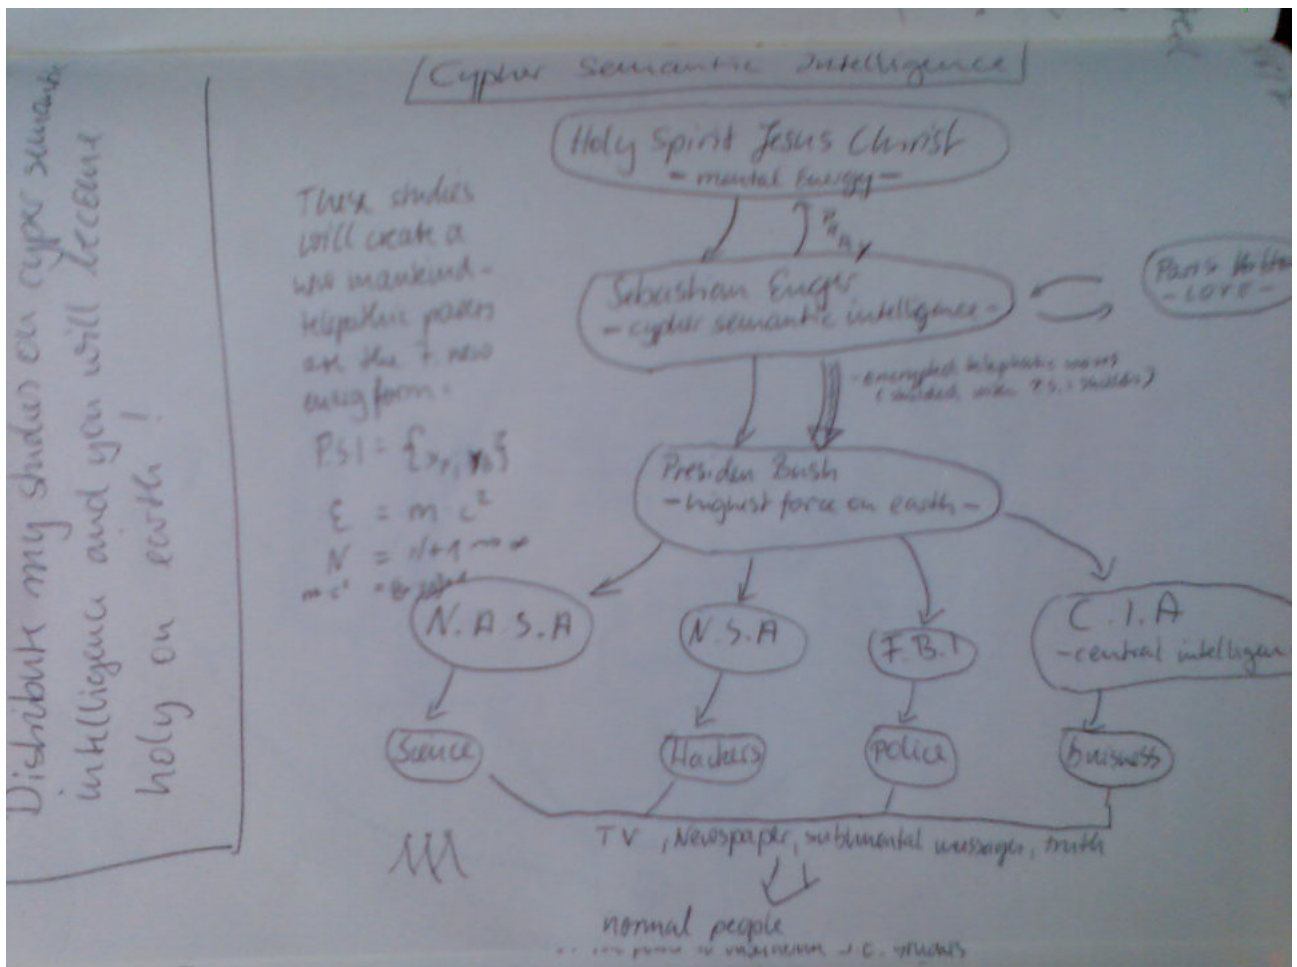

The soldiers of the future should learn PSI & CSI. They should get orders to be forced to listen to these courses at least once a day and at last 1h a day and there should be training camps specially for P.S.I and ***Cypher Semantic Intelligence Networks*** and there should be lessons and tests about it so that the future soldiers become good telepaths! The soldiers should get those music from their radios or mp3s that are before checked to be good – in the way of sublime messages that are hidden in these tracks (eg. ManOWar – Warriors of the World!) and in relationship if these music for the soldiers is good to make them good telepaths ... hope you understand me. [Summing up – make your soldiers good telepaths and the first step to win the next war is done!](#)

Sss After a reasonable amount of time of their telepathic [education /instruction test their abilities with scientific remote viewing, scanning others minds, exchange of telepathic thoughts, playing mind ping pong, 2 telepaths playing chess against each other and so on. CIA give your soldiers, trainies, followers subliminal messages hidden in music the listen to to form your future soldiers.](#) Then when war arises there must be a telepathic leader (one with the strongest telepathic powers) - for example a simple soldier maybe a Private (it is force that he must be the best telepath that you or the military services have to offer) and then must mentally lead the soldiers that he commands. The mental connection between the mentors eye (=the strongest telepath) and his following orders (=the soldiers with good telepathic powers) must be established as be seen on my ***Cypher Semantic Intelligence Network***. Then during or before the fight the soldiers and the leader must get physical information of the battlefield (as it is done in current wars on IRAK etc.) and then with their telepathic power exchange between leader and soldiers the soldiers get in their own mind the telepathic orders from the mentors eye(=the private that has best telepathic powers) when to fight, when to kill, where to find the others to kill. In the future wars the key to success is telepathy. It is important that soldiers can think about everything(!) that surrounds them and send telepathic powers with their impressions back to the telepathic leader. The telepathic leader then must filter out the unimportant facts and give telepathic instructions back into the minds of the soldiers. But the soldiers and the leader must be able to protect their thoughts from foreign influences. They must use the Cypher aspect on my ***Cypher Semantic Intelligence*** Studies.

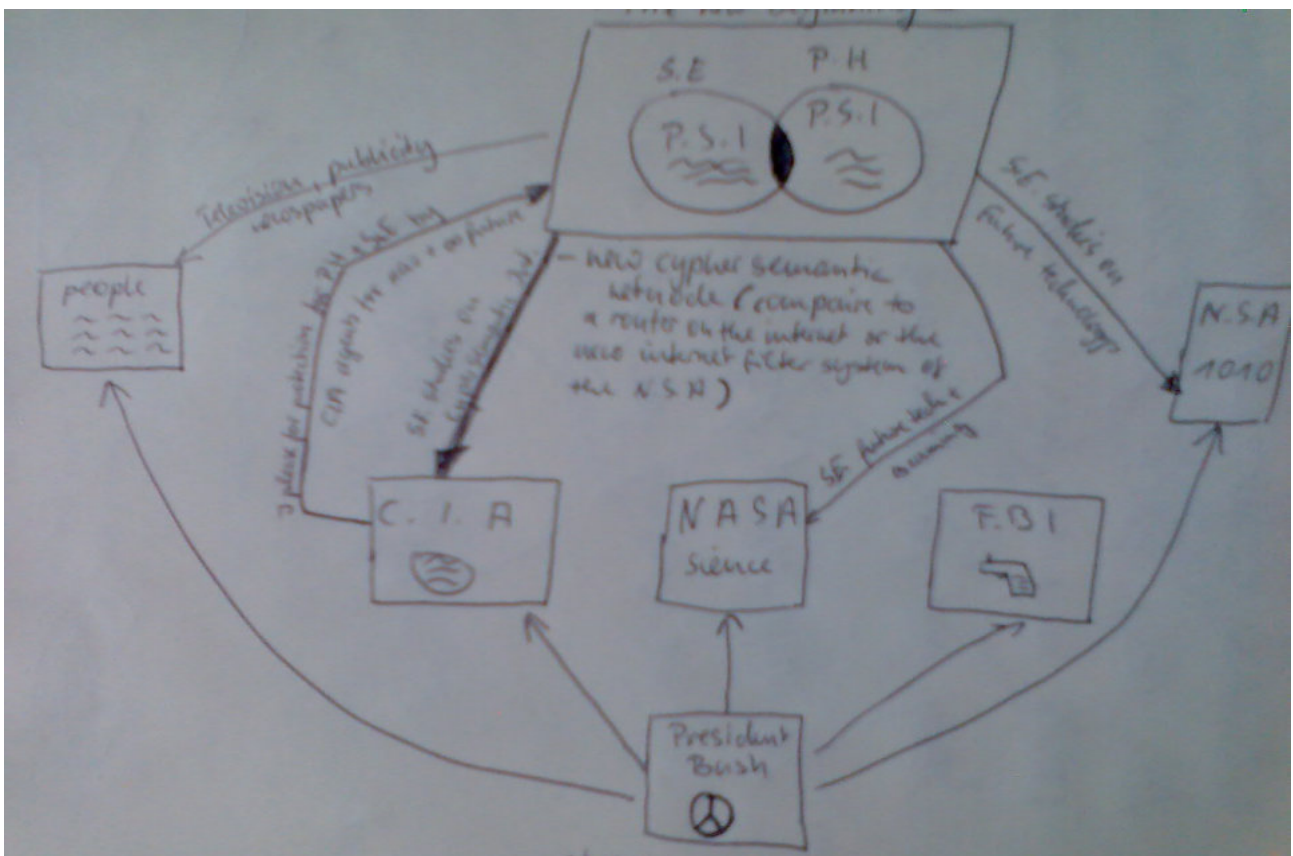

Summing UP:

Telepathy is the key to succeed in future wars.

[Sublime messages with hidden telepathic messages in music, radio, tv and newspapers will manipulate the minds of the american society and will prepare them to become a good/bad telepath. A nation of telepaths - that is my dream. A Build up nation of telepaths will prepare USA to rule ... the whole world.](#)

4.)Future Technology

4.1.)The Art of Beaming

it is already possible to leave earth and travel to the stars: here on earth it is called lucid dreams. please study Dick Sutphen and his work on psychic development course.

teleporting is also already possible: one can slip into the minds of other people this is so called telepathic and psychokinetic power: the future of beaming will be that the human DNA must be fully analysed and worked out in a very short amount of time by a special machine that can analyse the the physics of a human being in a short amount of time: eg a mixture of X-Ray and combined with Magnetic Resonance Tomography in a time under 1 second.

the psi and psychic aspect is to be analysed with analysing the brain structures of all known brain wave and one must then find the brain wave pattern of that human being (compare to EMG the thing that analyses the brain waves when one is in sleep therapy). combine the two aspects of psychic and physics and then make it to be store as binary system of informatic technology and transfer that into the body + mind of the other human being: a very dumb form of beaming is calling someone on his mobile phone - make up your mind about that and you will learn what i mean with that.

4.2.)Photon Torpedos

It is some kind of Laser Technology combined with electro shockings like to be seen in the movie Minority Report. Please compare it to my studies of P.S.I + P.C.I and my studies on personal central intelligence in relationship with H-Bombs and one will create a photon torpedo.

4.3.)The Age of P.S.I

My studies of PSI are based on my law of 2 complement different things, Dick Sutphen's psychic development course and some PSI related books and i made some notes about it on my communications course of professor Winkler.

I came to the conclusion that every thing on earth can be described with 2 kinds of energy: physical and mental (eg: psychic) energy. I said that N stands for New, but i see that N is a mathematical symbol for the Holy Spirit Jesus Christ. I said that N consists of xN which is physical energy (compare to the studies of Darwin and the biological rule that XX is the female chromosome pair - attractive and beautiful) and yM which is psychic energy (compared to biological rule that xY is male chromosome pair - brilliant mind). Whenever something is created or thought about these 2 kinds of energy are sent out: in the brain via electrical impulses and via biological structures - nerve cells). this is a new rule! in my law of 2 complement different things i gave an idea that ppl can create a house building machine with manpower, and other ppl can create a house destroyer machine. its energy and anti-energy, compare to matter and anti-matter or proton and electron or "+" and "-". i used De Morgan's Law to say that energy and anti energy are complementary: $(A \cup B) = (\neg A \cap \neg B)$ means "Gegensätze ziehen sich an" but $(A \cup B) \cup (\neg A \cap \neg B) = !0$

>>>>>>>>> The Unknown PSI Energy is the 7. Energy Form here on earth <<<<<<<<<<<<

* Kinetische Energie wird auch als Bewegungsenergie bezeichnet. Sie wird durch die Bewegung eines Systems gegenüber einem anderen System und durch seine Masse bestimmt und setzt sich aus Translationsenergie und Rotationsenergie zusammen.

* Potentielle Energie wird auch als Lageenergie bezeichnet. In der Mechanik ist sie die Energie eines Systems, die es durch seine Lage in einem Kraftfeld besitzt, zum Beispiel im Gravitationsfeld der Erde. Auch die Elastische Energie (siehe unten) wird zur Potentiellen Energie gezählt.

* Schwingungsenergie: Schwingungen sind allgemein (auch über die Mechanik hinaus) durch einen periodischen Wechsel zwischen zwei Energieformen charakterisiert. Beim Pendel wechselt die potentielle Energie bei maximaler Auslenkung mit der gleich großen kinetischen Energie während des Durchgangs durch die Ruhelage ab.

* Elastische Energie ist die potentielle Energie der aus ihrer Ruhelage verschobenen Atome oder Moleküle in einem elastisch deformierten Körper, beispielsweise einer mechanischen Feder. Allgemein bezeichnet man die Energie, die bei der elastischen oder plastischen Verformung in dem Körper gespeichert (oder freigesetzt) wird, als Deformationsenergie.

* Schallenergie: Beim Schall schwingen die Atome in Folge der Elastizität eines Festkörpers oder der Kompression einer Flüssigkeit oder eines Gases im Takt der Frequenz zwischen der potenziellen Energie der Auslenkung aus ihrer Ruhelage und der kinetischen Energie beim Durchgang durch diese Ruhelage. Der Begriff akustische Energie bezieht sich auf alle akustischen (teils nicht von Menschen wahrnehmbare) Schwingungen.

* Wellenenergie ist ein Sammelbegriff, der nicht nur auf die akustischen Wellen zutrifft, sondern auf alle räumlich ausgebreiteten Schwingungsphänomene wie z. B. Wasserwellen und elektromagnetische Wellen.

* PSI Energy: {xP;yB}; -> it is the only energy form that can be transfered into all other energy forms and vice verca , it is the energy that has its origin + beginning in God Jesus Christ

Please study my work on Cypher Semantic Networks, PSI Formula is part of the so called World Formula. I will present the Final World Formula in 3 Years from now: when i am 29!

4.4.)The Future of electrical engineering with focus on unlimited current powers

The future will be an H-Battery based on the idea behind the H-Bomb. The Technics behind the h bomb must only be small down (currently tis the sun power system accu cell, but in the future there will be h-accus: a god must only breath out to produce new enenergy. so if one can make the theory of the H-bomb small enough so that it fits to a small bag pocket and one can make simple water as basis into this accu eg to fill him with energy then veryone in the universe can have unlimited energy powers just with the help of PURE WATER!

4.5.)P.C.I Technology - personal central intelligence

C.I.A = C.A.I = cypher alien intelligence

I guess that in the future everyone with the help of my theory on PSI will have an guarding angel around because the PSI waves which are indepentant of time and space can go back and forward and are the ONLY energythat can be transfered lossless into every other know energy form and vice versa that very thing and think in the whole dimensions can have a so called guardian angel for veryone on ... so extraterrestrial life is already on earth. Protect the best and take the Best: personal

central intelligence - everyone can use telepathic powers to beam oneself into any other things and thinks and take away good and bads from this person and when everyone (!) on earth would use his own brain to think about every little moment in his life this would create a PSI of unlimited gods: please use $E=mc^2$ and use as mass the brain of a human being. use this formula in relationship to my former PSI studies and one will create a nation of PSI intelligence that where everyone is a god with telepathic powers. when everyone uses his own mind every single second of his life then there is being created a psycho semantic network (please compare to the technique of the internet) of telepathic waves (alpha, omega, theta and the rest of the known brain waves like to be seen on German Elektroenzephalographie) the future. It is the future internet of PSI. Please compare to the "wellenüberschneidung im wasser wenn man einen gegenstand hineinwirft" and you will see what i mean with the Name "Gaussian Waves".

i WANT it to be called Cypher Semantic Network: CSN and Cypher Semantic Intelligence: CSI, because telepathic waves can be encrypted by the strongest force on earth :: love+PSI so that one cannot look too far into the future!

4.6.)The future of biological engineering with focus on unlimited computer powers

A few years ago i studied information technology at the university of applied sciences in Mittweida and there i had some math lessons with professor Griesbach. i made up my mind about his studies and came to an idea on how to encrypt every code on earth by using a special encryption system. i said that fractals must have been used to crack codes but my professor didn't understand me. he simply couldn't follow my mind. i said that one shouldn't use sequential or brutal force to crack code one should use a mix of fractals and multi level marketing management structures to crack codes. this new intelligent system described in the last sentence can be used to crack codes faster than ever before. i went to another professor, professor Schulz and told him my idea. he told me that this idea is based on binary trees but he was wrong. he didn't understand my idea - he couldn't follow me. but he gave me the hint that the dataflow of such a system currently cannot be controlled with current-day-technology but i found the solution for this problem in nature - bio technology: with the help of the growth of special bacteria or cell cultures one can create unlimited intelligent powers. one has to control the growth of these cell cultures in an intelligent way and then one only needs to create a brilliant advanced programming interface for these cells back to the binary system of informatics and then one will have unlimited computer powers for the future. (the cell growth must be fast and must be on fractal basis as seen on exponential use through fission) This is Sebastian Enger being in Love with Paris Hilton's Theory on the future of biological engineering and this is proved true with the help of Einstein's theory of relativity and his formula $E=mc^2$. Fractals are nature's lost secret to success. Fractals are what professor Hawking is searching for his whole life - with PSI, IT, Energy and fractal structures plus Multi level marketing everything is possible in the future - even beaming, time travels, codebreaking and the rebirth of the Holy Spirit Jesus Christ.

4.7.)The future of biological engineering with focus on unlimited computer memory storage

Please see my last dossier on studies of "biological engineering with focus on unlimited computer powers" and use the idea behind that and then only create the cell structure growth and then use laser technology to beam the information into that cells. the bigger and faster the growth of the cells the more storage one can create by doing writing the information into that cells. after that cool down the cells and the information is being stored in it. please compare it to cloning but please don't use embryos. when cooled down the information can be extracted again from the frozen cells. this is the memory storage structure of the future.

- psi energie breitet sich von einem punkt in alle 3 dimensionen aus; PSI ist die 4 dimension ;

- jedes lebewesen senden PSI aus, machmal kleiner manchmal größer ;

- psi ist unabhängig von zeit und raum, es ist unendlich und bewegt sich außerhalb des bekannten psysikalischen raums

- da jedes teilchen psi sich ständig mit anderen psi teilchen überlagert: es arbeitet wie eine 4-dimensionalle welle im weltraum,

so kommt es zu psi überlappungen, diese überlappungen können gefestigt werden, wenn man sein psi tainiert und einfach weiter bittet, betet und mit purer match verlangt

- die überlappungen führen zu stapilen psi netzknoten und können als basis für zeitreisen genutzt werden,

das universum wird durch PSI geschützt vor fremden einflüssen wie viren, bakterien und negativer energie, darum muss man sein shi und sein Psi in einklang bringen,

damit man einen neuen stabilen netzknoten schaffen kann, von dem aus weitergereisst werden kann - positive energiefelder schaffen dir freude, lachen, trost, liebe,

warmherzigkeit und freiheit = meine manische phase

- negative psi energien werden verwendet für hass, krieg, tod, krankheit

"das universium und sein psi netzt wird die starken immer abfedern und sie ins heilige führen, es wird uns beschützen, denn wir sind nie alleine."

ich wurde auserkohren, im universum für einen kleinen augenblick das licht gottes zu sehen , danach die psi sin flut

ich werde alles in meiner macht stehende tun, damit das universum vor fremden und negativen psi energien gestört wird, ich werde beide psi energiene nutzen

6.)Last Words

This dossier fairly reaches no CIA standarts but it is needful ... i want it to be spread my way. Think of my Name Sebastian Enger and i will become rich!

For my future i have the following wishes:

- Please let there always be a true CIA Agent from the UNITED STATES OF AMERICA around me Sebastian Enger and around my Love Paris Hilton and please talk to me as i am very, very shy , because i feel better with the thought in mind that intelligence is around me - that would give me a perfect feeling - i speak german and a little english - AND I SPEAK **P.S.I.**

- Please protect us from every negative influences and Please protect us from guns

- Please protect my Family Enger, Please protect the Hilton family and Please protect us till the end of time

- Please help my with my Bitjoe Communications GmbH and our daughter companys, currently the webpage <http://www.bitjoe.com> is a redirect to [zoozle.biz](http://www.zoozle.biz) but i am realising some market defining programmes for the mobile phone communications sector that are simply great - i would like to sell the company in a few years
- Please help me with my search engine [zoozle.net](http://www.zoozle.net)
- Please study my work and Please keep it a "secret" because it is too dangerous for the current mankind
- Please pray for my name Sebastian Enger every day because that is part of the *cypher semantic intelligence network*
- Please provide us with new information what is need as invetion in the future I will care for it
- Please let there be a professor title for me in the future of USA
- Please let me see the real socialite american society
- Please let me become real and true famous in the untited states of america
- Please let us be part of the Illuminatus
- Please let me be part of the Hilton family
- Please let us be healty and wealthy
- Please let me study on M.I.T
- Please be GOD for ME
- Please be CIA
- please let me get a new life in USA, please get me a greencard, please get me my love Paris, please let me forget my fucking hard life i had in germany, please spread me ideas, please build me a physical memorial with my name Sebastian Enger on it while i am living – a PSI memorial that is eternal(i dont mean a grave ... that will i get for free them i am dead), please let me become ... one of you!
- *please do something that Paris is not so long in jail!*

I know its not my time to do perfect work any more. I know that with analysing my books you will find out whats the real me inside.

In highest honors,
Basti Enger
